Ah yes!

Here is a link to the google drive: https://drive.google.com/open?id=1yQWRPL0cXr3sBe7UONpS7yzCGN2pmcBu

Below you will find the original text from my email (for a bit of context)

Julie

==========
Hi Dave,

I have updated the NERRS Reporting script "01_Load_Wrangle_Run.R" to correct for the typo described here: https://github.com/NOAA-OCM/SWMPrExtension/issues/32.

I have updated all of the "01_Load_Wrangle_Run.R" scripts within the CDMO automation directory and create a new zip file called "CDMO_Automation_11-02-18.zip": https://drive.google.com/open?id=1yQWRPL0cXr3sBe7UONpS7yzCGN2pmcBu

This file will supersede the original zip file called "CDMO_Automation" under the "03_and_06_Code_Analyses_and_Automation > CDMO_Automation" folders in the deliverables package I linked you to a few months ago. You will also want to send a copy of this zip file over to Melissa and the rest of the CDMO team before they run the next year of analyses.

Also, please note that while I did update all "01_Load_Wrangle_Run.R" files, I did not re-run the reserve-level analyses. I simply ran a sport check on nutrient data to make sure that the updated script didn't cause a problem.

Subject: Updated Status Report Package

Hi everyone –

Julie – it was great to meet you last week - I'm sorry we didn't get a chance to chat more!

I wanted to follow up on the updated status report package – do we need to pull that down from the google drive? Or, Dave, has that "For CDMO" automation package been updated in your ftp directory? I just want to make sure that the update doesn't fall through the cracks.

Thanks!
Melissa
